

TECHNICAL DATA SHEET - TAPIT ALL ANTI-SEIZE COMPOUND

Tap It All lubricants, LLC of Colorado Springs CO has developed (patent pending) an anti-seize compound that is 100% bio based, no petroleum.

- **Non-Toxic**
- **Non-Corrosive**
- **Non-Carcinogenic**
- **Environmentally safe**

A derivative of a proven paste formula used to machine/tap titanium alloys, Inconel, Hastelloy and other super alloys. Both the Anti-seize and Machining Paste offer extreme pressure protection, rapid temperature transfer, and hydrophobic attributes. This compound has been successfully used in down hole pumps and API pipe joints associated with these pumps. It outperformed (no galling) current toxic anti-seize compounds.

PHYSICAL DESCRIPTION:

Smooth Dark green/gray/black color with a semi-solid consistency

Superior performance in Anti-seize, Lubrication, and Corrosion protection

- **Possesses extreme lubricity and heat transfer**
- **Extreme hydrophobic properties**
- **Prevents threads from galling**
- **Unique ability to stay where applied.**
- **Works well in both hot and cold weather**
- **Long lasting, will not break down or dry out and harden**
- **Apply generously by hand, brush, or mechanical application**

CLEANING:

Clean with any Methyl Ester. High pressure steam or hot water also works. Chemical cleaners are not recommended.

HEALTH AND SAFETY:

No health or safety risks are associated with this product
